

GRANT COUNTY • BRING A NEIGHBOR

Tuesday 1 September • 8:00 a.m.

County Commission — Commission Room, Courthouse, 210 E 5th Ave, Milbank

WHAT'S HAPPENING

- **Ordinance 2026-01** (data center rules) was **tabled 18 Aug** — only four commissioners present. **It has not passed.** It can come back.
- **NextEra** presented a **500 MW battery project**. The county's zoning ordinance **does not address battery storage at all.**
- A **765 kV line** setback is being drafted. County range: **850-1,000 ft**. Residents asked for **2,000 ft** — and many of us think even that isn't far enough.

WHY YOU SHOULD CARE

- **These rules decide how close all of this can be to your house** — and once written, they govern every project that follows.
- **Water.** The water rules only apply above **10 megawatts of "IT load"** — and the ordinance defines IT load as **"excluding cooling or facility infrastructure."** Cooling is the part that uses the water.
- **Noise.** These run day and night. Developers already told the county our noise limit "has been a barrier to past development."
- **Your land.** 765 kV towers stand **150-175 feet tall** on a wide corridor through ground people farm — GPS guidance and aerial spraying included.
- **Nobody is coming to ask you.** These decisions get made at 8 a.m. on a Tuesday.

WHAT YOU CAN DO

- **Just show up.** Anyone may speak — 3 minutes, no notice needed. State law requires it (SDCL 1-25-1).
- Say your name, where you live, **one point.**
- **Written comments & materials must be sent ahead** to be entered in the record:
Kathy.Folk@grantcountysd.us, cc
Kevin.Owen@grantcountysd.us
- **Ask for a citizens' task force** on these ordinances. The commission can create one by motion — they already run a **Drainage Task Force.** **We should have a say in rules written about our own back yards.**
